

## Assignment 1 – Getting Acquainted and Setting up Your Environment

1. Complete Start of Semester Survey found on blackboard
2. Create your own remote repository by forking the class repository
  - a. Follow instructions in GitInstructions.pdf
3. Create Readme file with the following information.

( <https://docs.github.com/en/get-started/writing-on-github/getting-started-with-writing-and-formatting-on-github/basic-writing-and-formatting-syntax> )

- In the Week 1 folder, create a file called <INITIALS>\_week1.md
    - o This can also be done on the web interface of your GitHub repository
  - In the .md file demonstrate the follow markup by writing a small biography about yourself and why you are taking this class. See BPL\_week1.md for examples. Have fun with it.
    - o Use at least 2 headings
    - o Use a list
    - o Use a picture
    - o Use a table
    - o Use Bold and Italic font styles.
  - Once the file has been made
    - o Commit it and push it to your local then remote repository.
    - o Create a pull request with the upstream repository.
4. Download and Install Anaconda and RStudio
    - a. <https://www.anaconda.com/download>
    - b. <https://docs.anaconda.com/free/navigator/tutorials/create-r-environment/>
